

*This man is backing up
his entire company's data.*

Kwiklink BackupPro

Fast, safe, and secure

Keeping your data safe and secure has never been easier with Kwiklink BackupPro - your important files are backed up to the Kwiklink data centre with the click of a button.

No tape drive! No additional backup software! No tapes to move! All you need is KwikLink BackupPro!

Easy, Fast, Protection

Using KwikLink BackupPro, you can quickly and easily save and restore files from your computer. Using FastBIT technology our system only backs up files that have changed since your last session. Your information is safely on the KwikLink BackupPro servers and you are protected against failures of your system, accidental deletion, fire/theft, etc.

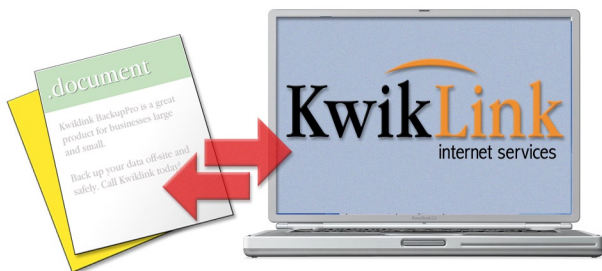

KwikLink BackupPro is great for individuals traveling and for home offices. Any Internet connection allows you to backup/restore your critical files with piece of mind.

Your Data Is Safe

KwikLink BackupPro ensures that your data is safe each step along the way. Any data being backed up is first encrypted and then sent to the KwikLink data centre. Even the KwikLink staff are unable to retrieve your information without your secret backup code.

Automatic Protection

You don't need to remember to perform your backups - Kwiklink BackupPro allows you to schedule automatic transfers of your important files to the backup system.

**Protect Up To 1 GB Of Files
For Only \$29.95/Month***
